October 2019

Dear Sir or Madam,

I am writing to express my interest in your internship programme. I believe that software engineering and especially algorithmic implementation is a strong suite of mine and I am keen on expanding my knowledge and acquiring new skills. I therefore confidently express my interest in your posting and would like to be considered for the position.

As my resume suggests, I have hands on experience in software development through both the projects I have completed during my studies at university and personal projects that I have created during my free time. This summer I have furthered my knowledge in machine learning and Python by performing data analysis and building prediction systems. In addition to this, during my second year of undergraduate study I will be working with the Java programming language, which will boost my development skills in object orientated programming and Java. I am also versed in c++ which I have used to create challenges for 'Hacker Olympics 2.0' competition for the Glasgow University Tech Society.

Additionally, I believe that it is not enough to just be influential in technical skills, I find that engaging in the software community is a huge passion of my, which is why I try to participate in as many events as possible and have helped to organise a few. I am also an active committee member of the Glasgow University Tech Society who organise events such as the Glasgow University hacktahon. Furthermore, I have developed my communicative skills at every presented opportunity, having two languages at a native level and one at intermediate. In addition to this I have participated in events such as 'Do you have the GUTS' hackathon, taking the Morgan Stanley challenge, during which I worked with a team of developers to create an artificial intelligence to control tanks in a given unity game hosted on a server.

I am very interested in the possibility of improving my software development skills and learning from experienced engineers. If it is at all possible I would appreciate a few minutes of your time to further discuss this opportunity.

Thank you for considering me for this position. I look forward to talking to you.

Sincerely,

Ivan Nikitin
